

Capital Venture software is used by many companies to **support their growth**. Thanks to its customization capabilities and its user-friendly interface, Capital Venture software provides **tailor-made solutions** for the Private Equity and Alternative Investment industry :

### **GPs - LPs - Asset Servicers**

Capital Venture software is a solution published by Klee Group. Founded in France over **35 years** ago, Klee Group is a 1000-employee IT company dedicated to consulting, digital integration and software publishing.

The **strong expertise** of Klee Group's teams across several fields allows it to meet the **specific and complex needs** of Capital Venture users.

Capital Venture has allowed us to secure and automate several of our business processes but also to digitalize our communication with our investors through the Extranet. It answers the needs of both the investment teams and the operations department.
