

Portfolio Management Platform For Modern Investors

Rundit offers to streamline operations and digitise back-office data flow:

Companies > General Partners > Limited Partners.

Problems

- **Tracking and monitoring portfolio KPIs** is tedious.
- Gathering **updates from startups** is taking too much time and effort.
- **Managing portfolio data** in spreadsheets is easily prone to human error.
- **Portfolio and fund overview** is not available as the data is stored in different formats and places.
- **Portfolio and fund-level data reporting process** should be more efficient.

Track Your Portfolio Performance Better

Rundit helps investors to:

- Create standardised portfolio reporting templates which include Management Reports, different KPIs and ESG Metrics.
- Easily share templates with entire portfolio.
- Automatically and manually remind companies to do timely reporting.

Rundit helps portfolio companies to:

- Create professional reports that include management report, KPIs, ESG metrics and charts.
- Share reports with all their investors, including the ones who are not Rundit customers.
