

# AcceleX allows investors and servicers in alternative assets to quickly and easily acquire, extract and analyze investment data.

## PRIVATE MARKET CHALLENGES

### We are solving key challenges for private market investors:

In an industry challenged by growth and increasing complexity, market participants need accurate and timely data more than ever.

However, private market data is largely opaque, unstructured and contained in a wide range of complex documents, such as:

- Periodic fund performance reports
- Capital account statements
- Capital call and distribution notices
- Fund financial statements and more

Traditional methods of data extraction, reconciliation and reporting are highly manual, time consuming, fragmented and error prone.

## ACCELEX SOLUTION

AcceleX harnesses AI and machine learning to automate how you access, extract, organize and analyze data from your alternative investment portfolios.

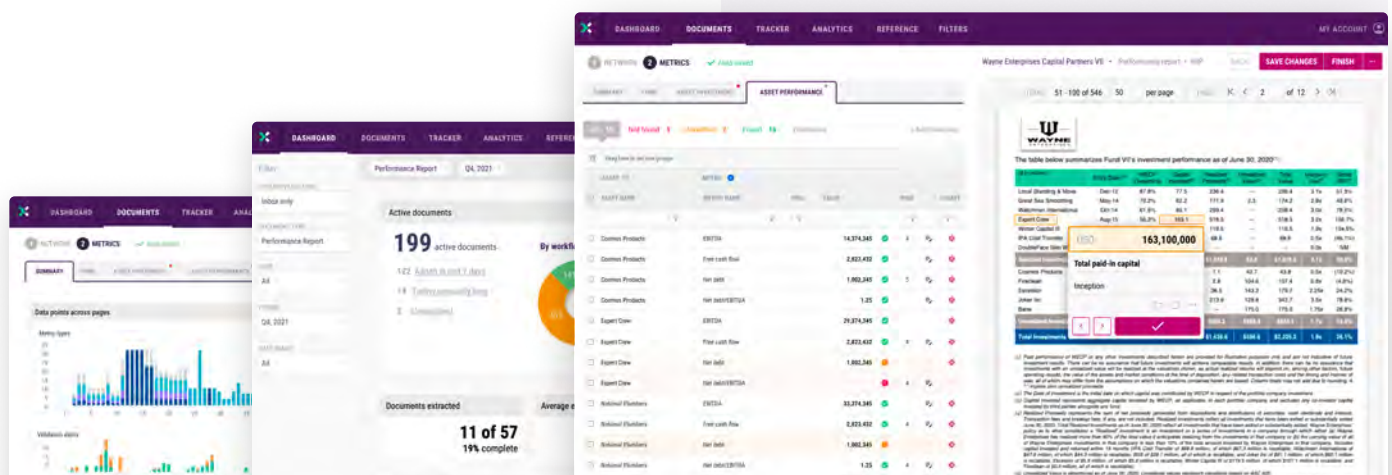

The platform offers a unique picture of your investments – from the overall portfolio, all the way down to the underlying assets, helping you drive better investment outcomes.

Typical benefits of digitizing your data workflows with AcceleX

**5x** data volume captured compared to manual processing

**90%** reduction in time spent on data acquisition and extraction

**100%** audit trail of your data from acquisition to analytics

## PLATFORM CAPABILITIES

### ◆ Innovate.

Enhanced document acquisition, identification, data extraction and validation

- Automated document acquisition and synchronisation
- File selection, categorization and status
- Initial data acquisition and checks
- Validation and optional manual data input

### ◆ Elevate.

A single integrated private markets platform for portfolio performance analysis

- Intuitive user experience
- View and analyse data in flexible dashboards
- Dynamic extraction without templates
- Integration with downstream systems

### ➤ Accelerate.

Enabling better informed investment decisions to unleash opportunities

- Reduced costs
- Increased speed
- Improved extraction accuracy
- Clear audit trail
- System-ready performance data
- Optimized investment returns

## TECHNOLOGY

AcceleX specializes in private markets, allowing us to leverage a unique combination of natural language processing, machine vision and heuristic approaches.

Our innovative AI technology makes automated document understanding possible – which drives accuracy, scalability and resource efficiency.

This enables you to gain deeper and faster insights into your private market investments, in a single integrated platform.
