Synopsis

The objective of this module is to provide participants with an understanding of the specifics of private equity valuation. This module will cover both theory and application of Market, Income and Cost approaches according to best practices, and the IPEV Guidelines.

Furthermore, the Venture Capital (VC) part of this module cover the specifics of VC instruments as opposed to private equity investments and how it affects the valuation process. The best practices under IPEV and USPAP/ASA guidelines will be discussed from both theoretical and practical perspectives.

Finally, the last part of this module will address the specifics of private debt valuation with a focus on key terms and concepts governing and structuring private debt instruments alongside an overview (from a theoretical and practical perspective) of recognized valuation methodologies in accordance with IPEV Guidelines.
